

## CAN I USE A ROHLOFF HUB ON MY CUBE BIKE?

---

### **ROHLOFF SPEEDHUB INFO**

Following several enquiries, we have double-checked the possibility of installing a Rohloff hub on CUBE bikes.

After speaking to both Rohloff and Velotech, we can approve installation without reservation!

### **Please note the following:**

- This approval only applies to CUBE frames **with integrated disc brake mount.**
- To ensure you do not invalidate your warranty and/or guarantee, original, frame-specific Rohloff components must be used.
- Installation must be carried out by a CUBE-authorized dealer. Please keep your invoice for the installation safe as this counts as proof for warranty/guarantee purposes.
- The instructions on correct usage according to the bike classification category still apply after installation.

**Modifications carried out by anyone other than a CUBE dealer are not authorised and invalidate the statutory warranty and/or our guarantee.**
